PROJECTS

ThesisConnect - Smart University Thesis Management System

- Developed a web-based thesis management system to support students, supervisors, and administrators throughout the university thesis workflow.
- Implemented features for team creation, supervisor allocation, thesis applications, progress tracking, meeting scheduling, and official notices.
- Reduced manual communication gaps by organizing thesis-related activities in one digital platform.

PhishGuard - AI-Powered Phishing Detection System

- Built a web-based phishing detection system for analyzing suspicious URLs and emails using rule-based checks and NLP techniques.
- Implemented real-time URL scanning, email spoofing analysis, unsafe link detection, and dashboard-based report visualization.
- Used Django 5+, NLTK, BeautifulSoup, and optional scikit-learn classification, with a clean responsive interface using Tailwind CSS.
